

PERSONALIZED MEDICAL RECORD TRACKING

SUCCESS STORY | THEORY & APPLICATION

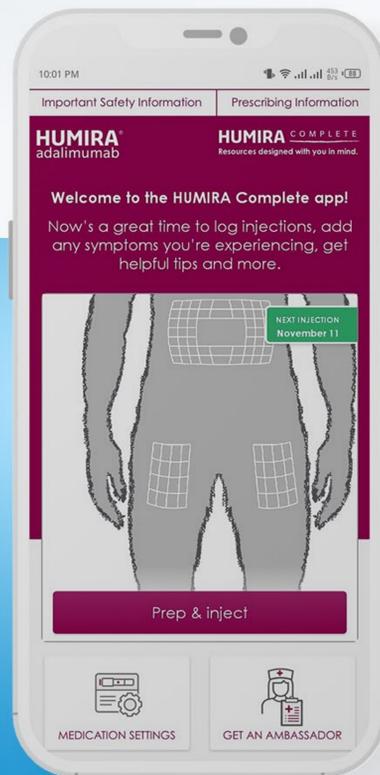

The experts of Virtual Resource Hub delivered this application that offers tracking medical records and the status of those registered tracks on this app with personalized medication reminders and many helpful features that guide the patients thoroughly with absolute guidance for dose tracking.

The Complete Medication Tracker App can help by providing resources that allow the users to set reminders, track symptoms, and create personal goals that can support and encourage them throughout their treatment journey.

CORE FEATURES & THEMES

The Complete App features personalized injection and symptom logging, medication reminders, and goal setting to support and encourage you throughout treatment.

- ◆ CUSTOMIZED INJECTION LOGGING AND TRAINING
- ◆ DAILY TRACKING FOR THE RINVOQ PATIENTS
- ◆ OPTIMIZED DOSE REMINDERS & MEDICATION TRACKERS
- ◆ ACTIVITY LOG & CALENDAR
- ◆ SYMPTOM TRACKING
- ◆ CUSTOMIZED GOAL TRACKING

CUSTOMIZED INJECTION LOGGING AND TRAINING

It keeps a track of when and where to inject either HUMIRA or SKYRIZI on the patient's body with injection records and history by date with details. It has in-app videos, training kits, and more to review injection training from the specified doctor.

DAILY TRACKING FOR THE RINVOQ PATIENTS

One of the features is that it makes it easier to stick to the treatment plans and track monthly progress with the RINVOQ dose tracker.

OPTIMIZED DOSE REMINDERS & MEDICATION TRACKERS

This app defines tools and has options to help manage medication with set reminders and enable notifications that help the registered users never skip/miss a dose.

ACTIVITY LOG & CALENDAR

It has a feature where the user can view their injection or medication schedule, symptom history.

SYMPTOM TRACKING

The application keeps a log of disease symptoms that can be helpful for complete medical history which results in more productive discussions about the treatments prescribed by the user's doctor.

CUSTOMIZED GOAL TRACKING

The user can set personal goals to focus on something personally meaningful to work toward that may help motivate and keep the user on track with the prescribed treatment plan.

This app is intended for the exclusive use of U.S. residents from 18 years of age and older. The Complete App is not intended to provide treatment decisions or replace the care and advice of a licensed healthcare provider. All medical analysis and treatment plans should be performed by a licensed healthcare provider.

It delivers resources that can support and encourage the user through every stage of HUMIRA treatment with timely reminders delivered by text, email, phone call, or app push notification.
