

# DELIVERANCE OF QUALITY & CHANGE THROUGH WORK ENGINE

**Mission & Challenge:** Global leading digital services providers needed the platform for their end-users and clients to have the virtual appearance to achieve their objectives by providing a platform in which consultants and experts can interact virtually offering their smart services. In other words, Portevo wanted a “work engine” that had features that were easily understandable for their clients to get a consultation as per their requirements. The overriding challenge was to achieve the smartest way to deliver transformation for any organization and make changes with a smooth consultancy route through Portevo platform.

## STRATEGY & DEVELOPMENT

The Virtual Resource Hub experts planned to cater to the challenges by formulation of long-term strategies that would benefit the client to achieve their targets at the maximum levels.

## 1. PROJECT DEVELOPMENT & DEPLOYMENT

Provision and Deployment of "Digital Face" through the formation of high quality and superlative progression of respective objectives set forth on their website proved to be the introduction of Portevo digitally throughout the globe.

## 2. SYSTEM ADVOCACY & ADMINISTRATION

The entire system was administered in an easily understandable way so that any client/organization could approach vetted experts and teams to resolve their projects professionally.

## FEATURES & DETAILS

It is a stage for professional services consultant network that combines the optimal blend of the best bits and hence provides scalable capabilities and frameworks of big consulting, the niche subject matter expertise of consultants and freelancers as it offers the technical smart marketplace that enables various clients to find the best fit expertise.

The work engine suggests refinements to the scope and approach of the engagement, harnessing the knowledge, experience, ingenuity, and insight of Portevo's network to analyze and deconstruct a client's challenge from the moment it is captured on the platform.

The engine uses algorithmic data science to match over 150 data points on the consultants to the Service of Work (SOW) modules selected by the client for the engagement. This ensures the client is presented with the best fit expertise structured in the optimal resourcing model.

## RESULTS & IMPACTS

Transformation as a cornerstone of business was the most obvious impact that led Portevo to achieve its objectives to the maximum levels, thereby benefiting many clients globally.

Formulation of a working engine was set forth that matched vetted experts & teams of those that offered precise work modules to fulfill the client's business.
